

12 policy priorities to strengthen and enhance your super

Super Members Council (SMC) asked all political parties and independents to commit to our 12 policy priorities to strengthen and enhance the super system for all Australians.

These priorities have three key objectives:

1. Safeguard the system fundamentals that make super a world-envied success
2. Improve the experiences of super fund members in their working lives and retirement, and
3. Make super fairer for those who don't get the full benefits of the system.

You can read more about our policy priorities and super [on our website](#).

Response from Zoe Daniel MP, independent Member for Goldstein

I am committed to a strong superannuation system that is fair and equitable. Every Australian should be able to retire with dignity. That's why I'm yet to be convinced there are any merits in weakening preservation rules such as allowing the early withdrawal of super for a house deposit. I endorse all twelve of the key policy positions outlined by the Super Members Council and I will continue to advocate for policies that strengthen the sector, in particular those that make superannuation fairer for women.
